

Using ChiMat Data and Tools to inform Commissioning of Children's Services

Practical & Interactive Workshop

Tuesday 17th April 2012

10am - 12.30pm and 1.00 pm - 3.30pm

Sandwell PCT, Kingston House

438 High Street, West Bromwich, B70 9LD

What is CHIMAT?

The Child and Maternal Health Observatory – ChiMat – is a national resource which aims to provide data on key child and maternal health issues in easy to use and accessible formats through the ChiMat website: www.chimat.org.uk

Who should attend?

Commissioners, strategic planners and service delivers who want to find out more about the child and maternal health information available through ChiMat and learn how to use the tools to access data to improve quality and outcomes and identify cost savings.

Programme:

The programme will be interactive with participants supported to use the website and tools during the workshop. The workshop will be delivered by Anna Sewell, West Midlands Local ChiMat Specialist and will include:

- 1) Introduction to ChiMat & support available**
- 2) Overview of ChiMat Tools and Data**
- 3) Using the tools to access and analyse your local data to inform commissioning**
- 4) Benchmarking against other areas on a range of child and maternal health indicators.**
- 5) How to quickly access maps, graphs and pre-written text for your area to use in reports and presentations.**
